Contacts: Delete a contact on PDA and sync	✓	✓	✓	?	?	✗	?	?	✓	✓	✗	✗

✓ - Tested and worked successfully

✗ - Tested and did not work successfully

? – Not tested at this point in time

N.B: If you have conducted your own tests on a particular device, please let the Monash PDA community know by sending an e-mail to pdausers-l@its.monash.edu.au

¹ Best performance achieved using a Telstra NextG SIM card combined with a data pack. Signal strength may affect this service intermittently.

² Tested and working with Monash Connect service.

³ You must download the entire attachment to the PDA. The device must be able to download attachments.

⁴ Does not work correctly on all devices – ITS were successful in testing a Sony Ericsson P990i. Invitations are accepted but additional text and comments may not synchronise

⁵ The meeting will be created as a Lotus Notes Appointment by default
